

STAY INFORMED ON THE CORONA VIRUS

2019 Novel Coronavirus (2019-nCoV) is a virus responsible for the outbreak of respiratory illness first detected in Wuhan, China

Symptoms may appear 2 to 14 days after exposure and may include: - **Fever**; - **Cough**; - **Shortness of breath**

If you were in China in the last 14 days, had contact with anyone who has been in China or anyone who is infected with Coronavirus, or are experiencing these symptoms, you should first put on a mask and then inform our Practice Front Desk/Administration.

If you have these symptoms, then it is recommended to defer any **non-emergency** dental treatment.
